Introduction of Muance

Majestic walls with nuance

Muance is a Dutch contemporary design brand with a unique focus on digital wallpaper products, printed on exceptional materials. The Muance wallpaper collection offers a diverse range of beautiful, colorful and stylish designs which can be suited in most environments with the added potential to inspire the eye of the beholder. Interior design is ever evolving, styles and ideas are continuously flowing and the need for “out of the box” thinking is growing by the day. Do you have a profound interest for daring designs and are you in need of a wallpaper that will transform your space? Indulge yourself and embrace what Muance has to offer.

Designed by
INGA GRABOW

Nordic roots, a love for clarity, and a perfectionist spirit shape the foundation of Inga Grabow's design journey. Her creations unfold in the dialogue between classical motifs and contemporary art, brought to life with modern techniques. What emerges is not a single style, but a distinctive mix that reflects both precision and emotion. Architecture and nature are her constant companions — lines, forms, vast horizons, and untouched landscapes provide endless inspiration. From the subtle textures of stone to the most vibrant shades found only in nature, she transforms impressions into visual stories. Each design is an exploration of contrast and harmony, where tradition meets innovation, and where beauty lies in the details.

MUANCE

Welcome *and discover new*
forms of wallpaper design.

Technical material specifications

Matt non-woven

The Muance matt non-woven wallpaper is a dimensionally stable product that is most commonly used for the residential market. The base is made out of a fabric-like material made from long fibers, bonded together by a heat treatment. This process creates a mesh that bonds the wood fibers tightly together making the product extremely durable. The matt non-woven is made without textured embossing and an additional protective varnish (heavy metal free) is added for extra washability and scrub resistance.

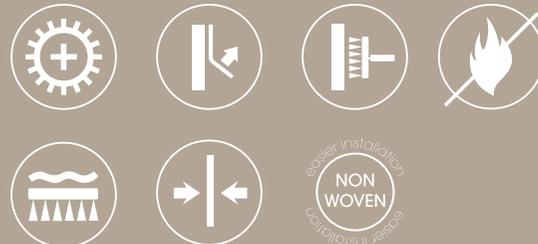

- PVC free and environmentally friendly
- Weight: 155 g/m²
- Thickness: 0.16 mm
- Printed with ECO friendly toner dry ink
- UV-resistant
- Fire Classification Bs1-d0 (European) & ASTM 84 (American)
- No addition of formaldehyde or heavy metal compounds.
- Width: 50 cm (19.68 inch)
- Dry-removable: comes off easily.
- Matt finish

- Thickness: 0.60 mm
- Printed with ink (Green guard certificate, low chemical emissions)
- UV-resistant
- Fire Classification Bs1-d0 (European) & ASTM 84 (American)
- Width: 50 cm (19.68 inch) & 100 cm (39.37 inch)
- Textured Fabric substrate
- Contract quality
- Washable
- High end effect

Grasscloth

Muance offers a completely natural product with its grasscloth, that is handmade from scratch. It has a woven topping of grass on top of a dimensionally stable non-woven backing. This will lead to a beautiful and characteristic result for the Muance designs.

- Weight: 285 g/m²
- Thickness: 0.70 mm
- Printed with ink (Green guard certificate, low chemical emissions)
- UV-resistant
- Fire Classification Bs1-d0 (European)
- Width: 85 cm (33.47 inch)
- Natural grass substrate (sensitive edges)
- Residential quality
- Washable
- High end effect

Pasting Guide

Step 1:

- Take the time to orientate
- Unpackage and unroll the wallpaper on a flat clean surface
- Pay attention to each panel number on top of every panel, this must follow in sequence (panel 1, 2, 3, 4 etc.)

Step 2:

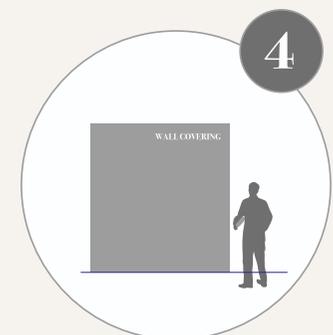

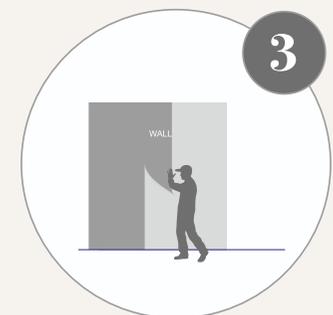

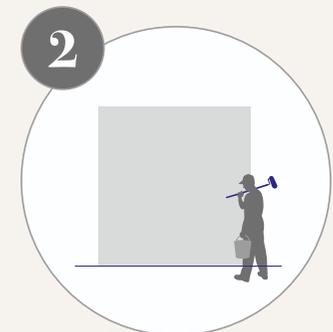

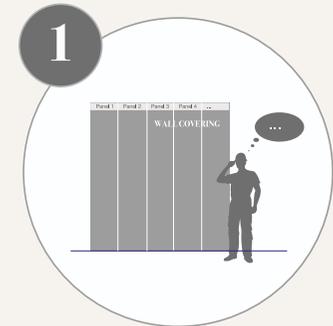

- Your wall must be completely flat, clean and dry. Levels rough surfaces, rough, holes and uneven spots.
- Your wall should be a uniform color. If not, you may notice differences in color on your wall once installed. If your wall has multiple colors, we recommend that you paint again.
- Make a vertical line with a plumb line on the left edge of the area you want to cover with the mural. If you do not have a plumb, you one can make your own by tying a heavy object on the end of a rope. This line is very important because it is the guide to start placing your mural.

Step 3:

- Applying glue on the wall evenly using a brush or a paint roller. Start distributing from the line you marked as a guide to the plummet. Don't paste the entire wall, do it only in the area that will cover the first panel on the left, leaving a few inches outside the right.
- Apply the first panel of the mural on the wall starting at the top left. Check that is aligned with the guide.
- Press against the paper with a dry roller or sponge to remove any air bubbles.
- Place the following panels in the same way in numerical order. The panels must not be mounted on each other but are set on edge.

Step 4:

- Clean the excess glue with a damp sponge.
- With the help of a ruler and a cutter, adjust the sides and the top and bottom of the wall if necessary.
- Let the wall dry for 24 hours; you will get a perfect final result

“Be **faithful**
to your own **taste**,
because nothing you really like
is ever out of *style*.”

Billy Baldwin
